02 · COST AND ARCHITECTURE

Multicloud & FinOps Audit

A review of cost, architecture, and risk across AWS, Azure, and Google Cloud in 4 weeks.

THE PROBLEM

The cloud bill grows every month and nobody can say exactly why. Resources run that nobody uses, accounts have no owner, and architectures cost more than they should. Finance asks, and IT has no clear answer.

WHAT WE DELIVER

1. Spend map by cloud, account, team, and application.
2. Savings identified and quantified per month, ranked by ease.
3. Quick wins for the first 30 days, which usually pay for the audit.
4. Review of resilience, backups, baseline security, and single-vendor dependency.
5. A six-month roadmap and a model for Finance and IT to review spend every month.

HOW IT WORKS

Week 1	Weeks 2 and 3	Week 4
Read-only access and spend map	Savings and architecture analysis	Quick wins, roadmap, and briefing

BaezLabs designs the plan and guides the decisions; your team executes. We don't sell licenses, cloud, or hardware.

NEXT STEP

A 30-minute call to understand your situation. Within 48 hours you receive a tailored proposal with scope, dates, and a fixed price.

FORMAT

Duration	**4 weeks**
Scope	**One, two, or three clouds**
Deliverable	**Quantified savings and roadmap**

Every proposal is built after a call, based on your company's size and needs.

WHO IT'S FOR

CIO, CTO, or CFO at companies spending more than $15,000 USD a month on cloud.

WHO DELIVERS IT

20+ years leading global infrastructure at large enterprises

$50M+ USD in cloud and AI spend governed

$2.5M+ USD in annual savings delivered

Xavier Báez, Principal Architect. AWS Solutions Architect Professional.
