04 · MONTHLY ADVISORY

VP Advisor, Cloud & AI

VP-level infrastructure judgment for your leadership team, without the payroll or the search for a full-time VP.

THE PROBLEM

Cloud, security, and AI decisions are now leadership decisions: they commit millions in contracts, the risk of an incident, and the strategy for years ahead. Hiring a VP with that experience takes months and costs hundreds of thousands a year. Meanwhile, those decisions get made without senior judgment at the table.

WHAT WE DELIVER

1. Monthly committee with the CEO and Finance: risk, cloud spend, and progress.
2. Sessions with the infrastructure or IT lead (biweekly or weekly, depending on the tier).
3. Review of strategy, architecture, vendor proposals, and cloud contracts.
4. Leadership advisory during major incidents: decisions and communication (not 24/7 operations).
5. Follow-through on the plan from a previous diagnostic (services 01, 02, or 03).

HOW IT WORKS

Month 1	Months 2 and 3	Every month
Context, priorities, and a leadership dashboard	Key decisions and guided execution	Leadership committee and progress report

BaezLabs designs the plan and guides the decisions; your team executes. We don't sell licenses, cloud, or hardware.

NEXT STEP

A 30-minute call to understand your situation. Within 48 hours you receive a tailored proposal with scope, dates, and a fixed price.

FORMAT

Format	**Monthly retainer**
Tiers	**Advisor or fractional VP**
Commitment	**3-month minimum**

Every proposal is built after a call, based on your company's size and needs.

WHO IT'S FOR

CEOs and boards that need senior cloud and AI judgment: no VP of infrastructure, mid-migration, or recovering from an incident.

WHO DELIVERS IT

20+ years leading global infrastructure at large enterprises

$50M+ USD in cloud and AI spend governed

$2.5M+ USD in annual savings delivered

Xavier Báez, Principal Architect. AWS Solutions Architect Professional.
